

Approaching Right Foundation Questions

Name: Date:

Your completed questions form part of the coursework required for assessment. Please contact Training Support for details of how to submit your work.

Please avoid 'short' answers of just a few words – answer the questions as fully as you can.

1. List the key points that you would cover in an 'approaching junctions to turn right' lesson.

2. Briefly explain the 'rule' that you can use when helping a pupil to understand judgement of approaching traffic and when to proceed when turning right and how you would use it.

3. List the skills/topics that should be covered before the learner tackles right turns.

4. When teaching right turns from major to minor roads what is the final observation observation check that you would teach and why?

5. If, when using scaling, your idea of the learner's score out of ten is higher or lower than the learner's own score what action would you take?

6. Why should you teach learners to keep their wheels straight while waiting to turn right?
