

Blind Spots: Worksheet

Name: Date

Sit in the driving seat of your car, with the seat adjusted to your normal driving position, and using the picture below, mark the areas of view blocked by the car's structure and the areas to the side and rear not covered by the driving mirrors.

Make a note of the action required to overcome any problems caused by the blind spots. There is at least one blind spot that you might have to get out of the car to check in some circumstances.
