

# *Junctions Approaching Left: Project Worksheets*

For this project you will:

- Read the Method notes below
- Determine your goals for the exercise
- Initially practise approaching to turn left for 30 minutes
- Choose a left turn route that also allows further practise with emerging
- Make a brief key point plan for further improvement
- Reflect on the outcome of the practise

## *Method*

Start your session by using the 'scaling' method to identify personal targets and focus your drive. *Take into account any learning from your practise with junctions emerging.*

Read the achievement targets, plus any of your own, before you start each drive. After your drive, read the targets again, this time provisionally tick off those that you are happy with.

This worksheet provides space for you record your targets and results for your initial 30 minute session, choose a suburban route with as many emerge situations as you can find.

After your initial practise, continue to work on your approaching skills when completing the other junction topics and every time that you drive.

## *Goals and reflection*

While you will start by setting your goals for this exercise you might revisit these after completing other junction exercises.

Reflective notes are required for this project as are the 'working notes'.

## *Junctions Approaching Left: Goals*

Name: ..... Date .....

The three main things that I want to achieve with regard to 'approaching junctions to turn left' are:

1.

2.

3

Now consider the evidence that will tell you that you have achieved your goals. What will be different, what will you see, hear and feel differently?

I will know when I have achieved the three goals above when:

1.

2.

3.

## Junctions Approaching Left: Achievement Targets

Name: ..... Date .....

Using the scaling method, score yourself before and after your initial 30 minute drive. There are thirteen assessment criteria therefore the average score for the exercise as a whole will be the total score divided by thirteen. At the end of each session make brief key bullet point notes as a plan for improvement.

	Before	After
<i>When approaching to turn left I:</i>		
Check my mirrors early		
Give a well-timed signal, allowing for the prevailing conditions		
Maintain/move to a safe and correct road position		
Make proper use of gears with no unnecessary downward changes		
Assess the 'new road' as early as possible		
<i>When arriving at the junction I:</i>		
Actively scan the footpath and new road for pedestrians		
Check my rear and nearside mirrors for cyclists		
Remain aware of approaching traffic that could turn across my path		
Consider the needs of others, for example large vehicles that may be turning		
<i>When turning I:</i>		
Maintain an appropriate speed and gear		
Keep looking out for other vehicles, pedestrians and cyclists		
Do not cause others to change speed or direction		
Check my mirrors and make appropriate progress after turning		
Total score		
Average score (total score divided by 13)		

*Action required for improvement:*

## *Junctions Approaching Left: Reflection*

Name: ..... Date .....

Use this sheet to write your reflective notes about your 'approaching to turn left' experience so far with this exercise.

Your completed notes form part of the coursework required for assessment. Please contact Training Support for details of how to submit your work.

- What have you learned?
- What have you learned about yourself?
- What do you need to improve?
- Where/how will you use the learning?

But you are not limited to these points and are encouraged to write anything that is relevant for you.
