

Junctions Emerging: Project Worksheets

For this project you will:

- Read the Method notes below
- Determine your goals for the exercise
- Initially practise left and right turn emerging for 30 minutes
- Make a brief key point plan for further improvement
- Reflect on the outcome of the practise

Method

Start your session by using the 'scaling' method to identify personal targets and focus your drive.

Read the achievement targets, plus any of your own, before you start each drive. After your drive, read the targets again, this time provisionally tick off those that you are happy with.

This worksheet provides space for you record your targets and results for your initial 30 minute session, choose a suburban route with as many emerge situations, left and right, as you can find.

After your initial practise, continue to work on your emerging skills when completing the other junction topics and every time that you drive.

Goals and reflection

While you will start by setting your goals for this exercise you might revisit these after completing other junction exercises.

Reflective notes are required for this project as are the 'working notes'.

Junctions Emerging: Goals

Name: Date

The three main things that I want to achieve with regard to 'emerging' are:

1.

2.

3

Now consider the evidence that will tell you that you have achieved your goals. What will be different, what will you see, hear and feel differently?

I will know when I have achieved the three goals above when:

1.

2.

3.

Junctions Emerging: Achievement Targets

Name: Date

Using the scaling method, score yourself before and after your initial 30 minute drive. There are fifteen assessment criteria therefore the average score for the exercise as a whole will be the total score divided by fifteen. At the end of each session make brief key bullet point notes as a plan for improvement.

	Before	After
<i>On approach to the emerge situation I:</i>		
Check my mirrors early		
Give a well-timed signal, allowing for the prevailing conditions		
Take up a safe and correct road position		
Make proper use of gears with no unnecessary downward changes		
Assess the 'new road' as early as possible		
<i>When arriving at the junction I:</i>		
Make full and correct observation, including additional mirror checks		
Comply fully with signs and road markings		
Stop when necessary but proceed without stopping when possible		
Consider the needs of others, for example large vehicles that may be turning		
Deliberately look for cyclists and motorcyclists and pedestrians		
<i>When emerging I:</i>		
When turning right, ensure that I can get fully across the road before moving off		
Initially look in my direction of travel		
Keep looking out for other vehicles		
Do not cause others to change speed or direction		
Check my mirrors and make appropriate progress after turning		
Total score		
Average score (total score divided by 15)		

Action required for improvement:

Junctions Emerging: Reflection

Name: Date

Use this sheet to write your reflective notes about your 'junctions emerging' experience so far with this exercise.

Your completed notes form part of the coursework required for assessment. Please contact Training Support for details of how to submit your work.

- What have you learned?
- What have you learned about yourself?
- What do you need to improve?
- Where/how will you use the learning?

But you are not limited to these points and are encouraged to write anything that is relevant for you.
